Junior Full-Stack Developer and **Software Engineering** graduate with hands-on experience building complete web applications from frontend interfaces to **backend APIs** and **databases**. Worked with **React, Node.js, Express.js, MongoDB, Firebase, MySQL, REST APIs, authentication, role-based access**, dashboards, and user-focused features through real projects such as RestaurantOS and ReAnime. Passionate about transforming ideas into practical solutions and solving problems with a user- and business-focused approach. Seeking to join a professional team where I can grow, take ownership, and create value through fast learning, consistency, and high-quality execution.

Education & Training:

- **Full-Stack Web Development Course — Newtech College 2025**

Hands-on full-stack training focused on building real web applications using **React, Node.js, Express.js, REST APIs, databases**, and **Git/GitHub**. Practiced turning requirements into complete working features by connecting **frontend UI, backend logic, API integration**, and **database operations** in team-based projects.

- **B.Sc. Software Engineering — Braude College of Engineering 2025**

Completed a **Software Engineering** degree with strong foundations in **software design, algorithms, databases, object-oriented programming, software architecture, testing**, and **data processing**. Developed strong **problem-solving** skills and the ability to **analyze requirements**, design **structured solutions**, and build **reliable software systems**. Official degree eligibility granted in October 2025.

Experience:

Full-Stack Developer Intern — Timing | 2026 – Present

- Developed and maintained full-stack features using **React, Node.js, REST APIs**, and modern **JavaScript**.
- Worked on **API integration, database operations, debugging**, and fixing **real application issues**.
- Driven by solving problems and turning ideas into practical solutions. Seeking to contribute, grow, and create value through ownership, continuous learning, and high-quality execution.

Selected Projects:

- **RestaurantOS | React, Node.js, Express.js, MongoDB**

Built a full-stack restaurant management platform featuring **authentication, role-based access**, order and inventory management, employee tracking, analytics dashboards, and **RESTful APIs**.

- **ReAnime | React, Vite, Firebase, React Router, CSS**

Developed a community platform with **authentication**, user profiles, content creation, comments, likes/dislikes, protected routes, and **Firebase-based data** and media management.

- **EEG Classification using NCD | Python, Pandas, NumPy**

Developed an EEG signal classification pipeline using preprocessing, segmentation, and Normalized Compression Distance (NCD) to analyze brainwave patterns on real-world datasets.
